

## Carole Tozer - Bio

I have always been passionate about growing people to be the best they can be – Supervision is a natural extension of this passion and I am currently supervising Pastors, Leaders, Chaplains, and Pastoral Carers in the mental health sector.

I have 20 years' experience with hands-on board level leadership and operational leadership of a Christian not for profit, community organisation in the mental health and social service arena. My experience offers insights into children, youth and families which also brings a broad understanding of the effects of socio-economic disadvantage and cultural diversity. I have a background in adult education and leadership.

As your supervisor, my role is to create a safe space, for you the expert, to reflect on ministry and gain new perspectives, to offer support and encouragement. I bring a fresh set of eyes, a new perspective, in which to explore familiar territory. Sessions can be tailored to meet your busy schedule, in person, by Teams/Zoom or by phone.

My life is balanced by 'loitering intentionally' around my growing flock of grandchildren, gardening and enjoying good conversations over a long cup of tea with friends. I love worship leading and social justice ministries.
